• **Description**

The 4th year - 8th semester of the B.Arch consists of Professional Training. During this term the students have to undergo training out-side the institute, in such offices /organizations which will give students the necessary opportunity to improve and consolidate their Architectural Knowledge. During the practical training the student is expected to work in accordance with the discipline of the organization, and will have to make progress which will be assessed in the form of Viva Voce Examination. The student had to submit a detailed report of the work completed during the professional training. Logbooks had to be maintained by the students and counter signed by the principal of the firm, and also by the teacher in charge.

• **Description**

The 6th semester i.e. second half of the 3rd year B.Arch consists of Professional Training. During this term the students have to undergo training out-side the institute, in such offices /organizations which will give students the necessary opportunity to improve and consolidate their Architectural Knowledge. During the practical training the student is expected to work in accordance with the discipline of the organization, and will have to make progress which will be carefully watched by the institution. The student had to submit a detailed report of the experience gained during the professional training. Logbooks had to be maintained by the students and counter signed by the principal of the firm, and also by the teacher in charge.

Percentage Analysis of students undertaking Internship AY 2022 - 2023		
Total Number of Students in batch		41
Number of students undertaking Internship		35
No. of students working in Indian Firms/ Offices		35
No. of students working in Foreign Firms/ Offices		00
<u>Number of students undertaking Internship</u> Total Number of Students in batch	X 100	85 %

Respected Madam/ Sir,

Bharati Vidyapeeth College of Architecture is offering degree courses in Architecture & Interior Design, for better understanding of subject, the students are advised to do case studies in their respective fields of Architecture/ design. The case studies are based on the site study.

Your site/store/ office/ industry/ SITE (ALIBAG) being one of the best examples for study, I would be highly obliged if you could kindly grant him/her permission for the study on a day and time as convenient to you. The study may include taking photographs, making copies of drawing and printed material and such other inputs as may required for the study.

This visit is for educational purpose only and the information gathered by this visit will be utilized for the purpose of study and not for commercial purpose. (TIME :- 7:00 am - 7:00 pm)

Looking forward for your kind cooperation.

Thanking you

Yours truly

AIM:

To conduct primary survey of forty-five Cessed Buildings in nine Municipal Wards of the Island City of Mumbai.

OBJECTIVES:

1. To understand the objective of the larger study on Cessed Buildings of Mumbai.
2. To shortlist five buildings from each Ward and of different typologies.
3. To conduct primary survey and gather information as per the questionnaire.
4. To prepare schematic plans and sections of the buildings.
5. To compile all the collected data in Excel in an organized format.

SCOPE:

The scope of this study extends to the Cessed Buildings of Mumbai.

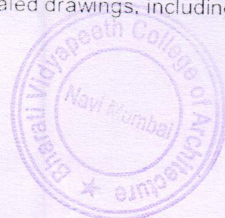

LIMITATION:

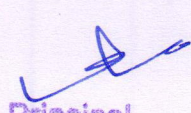

The survey is limited to the following types of buildings – residential (small tenement size), residential (large tenement size), commercial, mixed-use, and heritage.

METHODOLOGY:

This project encompassed conducting the primary survey of Cessed Buildings, which was done progressively in the following manner –

1. The team of six members was divided to form three pairs for studying three wards each.
2. Ward-wise sorting of buildings was done, from the data available on more than 20,000 buildings.
3. Twenty buildings from each Ward were shortlisted. The criteria for selection -
 - Taking four buildings from each of the following five types – residential (small), residential (big), commercial, heritage, and mixed.
 - Examining the possibility of locating them on Google Maps and checking their accessibility
 - Exploring the factors like building height and footprint from Google maps for a possibility of having substantial number of interviewees.
4. The primary surveys of shortlisted buildings were conducted to achieve five successful surveys from each Ward.
5. Photographic documentation of each building was done during the visit.
6. Architectural documentation was done by the team, wherein schematic free-hand sketches of the surveyed structures were prepared. These sketches were then redrawn using AutoCAD and Photoshop to produce proportionate and scaled drawings, including plans and sections.

Date

7. Multiple visits were scheduled to gather maximum possible information from the occupants of the buildings.
8. The complete interview data and building information was compiled on Excel for each of the 45 buildings.
9. A map showing the locations of all 45 buildings on the Island City of Mumbai was prepared.
10. All editable drawing files (AutoCAD), Excel, and Photoshop files were shared with Plural through a Google Drive link.

During the course of this study, all reviews/revisions required in all surveys, were addressed on a timely basis.

PROJECT DURATION:

The initial discussions regarding the outline of the project were started in February 2023. After multiple discussions, meetings, reviews, iterations, and inclusions, the study culminated in May 2023. The complete project payment (1 lakh rupees) was received in three stages on the dates - 25th April, 16th May, and 8th June, 2023.

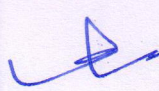

OUTCOME OF THE STUDY:

The study which was focused on conducting primary surveys of 45 cessed buildings, has resulted in collection of first-hand data and information from the tenants and landlords of these structures, their viewpoints on the condition of the infrastructure, and their preferences from amongst redevelopment/ renovation/ repair/ restoration of the building. The interview questionnaire was also inclusive of information on the socio-economic characteristics, demographic profile, tenancy type (Leave & license/ Pagadi/ Original), and the current market rent as opposed to that paid since the Rent Control Act. Documentation as per the architectural aspects was done in the form of building footprint, built-up area, unit area, orientation, location, number of floors & wings, among other heads.

LEARNINGS:

Cessed Building itself is a vast subject with its introduction, necessity, validity, application, advantages, disadvantages, repercussions, and the debate around it, all being very crucial and critical. Throughout the duration of the project, the team developed an understanding of the Rent Control Act, Mumbai Building Repairs and Reconstruction Board, Repair Cess, and Cessed Buildings, and learnt many intricacies of it. The study has helped develop an understanding about the Island City of Bombay and how rental housing functioned in times of dire need during evolution and growth.
